

This document describes how people can be invited into a private chatroom (only for staffchat.ethz.ch members). Anyone who's member of ETH and is having the link produced at the end will be able to join this room.

Create a private room ✕

Name
MyPrivateRoom

Topic (optional)
Only People with the link can join

Private room (invite only) ▾

Only people invited will be able to find and join this room. You can change this at any time from room settings.

Enable end-to-end encryption
You can't disable this later. Bridges & most bots won't work yet.

Hide advanced

Block anyone not part of synapse.ethz.ch from ever joining this room. 

You might enable this if the room will only be used for collaborating with internal teams on your homeserver. This cannot be changed later.

Cancel Create Room

MyPrivateRoom Only People with the link can join

Invite to this room 

Marco Schumacher Admin

Invite to MyPrivateRoom ✕

Invite someone using their name, email address, username (like @marcosch: .ethz.ch) or [share this room.](#)

Invite

Invited people will be able to read old messages.
